

Deniz Öztürk

Full Stack Developer | UX/UI Designer

I am a multidisciplinary **Full Stack Developer** and UX/UI Designer with a background in Urban Planning. My interest in software development grew from my work at the Center for Spatial Justice, where I focused on creating digital advocacy tools and internal management systems to address complex urban challenges. By combining spatial analysis expertise with modern tech stacks like React Native and Expo, I am dedicated to building high-impact, data-driven applications that streamline workflows and deliver intuitive user experiences.

Personal Info

Address

Kadıköy, İstanbul

Mobile

Education

Workintech, Full Stack Development

Program (6 months - 960 hours - 78 projects)
2025

Mimar Sinan Fine Arts University, Urban Planning

2015 - 2018

Mimar Sinan Fine Arts University, Urban and Regional Planning

2009 - 2015

Languages

Turkish, Native

English, Proficient

Certificates

Front End Development, Workintech,
06.2025

Full Stack Development, Workintech,
09.2025

UX/UI Design, Google & Coursera,
03.2023

SKILLS

Full Stack Development: Javascript, TypeScript, React.js, Node.js, PostgreSQL, Hooks, Context API, Redux, Axios, Cypress, HTML, CSS, Tailwind Css, React Native, Expo

Additional: Algorithms, Debugging, Deployment, Problem Solving, Figma, Teamwork

EXPERIENCE

BauPro360 GmbH - Full Stack Developer
2025 - 2026

- **Mobile App Development:** Developed the B-Management and W-Network mobile applications from scratch using React Native and Expo to digitize construction and HR management processes.
- **State & Data Management:** Implemented complex data flows and dynamic forms for project tracking, personnel management, and technical documentation using React Hooks and Context API.
- **API Integration & Debugging:** Managed seamless integration with backend services and resolved critical synchronization issues to ensure app stability in field conditions.
- **User-Centric Design:** Applied UX/UI principles to create accessible and efficient interfaces tailored for on-site construction workers.

Center for Spatial Justice, Istanbul - Co-founder
2017- 2023

- **Product Development & Digitalization:** Co-founded the organization and spearheaded its digital transition by designing and implementing a custom financial monitoring tool and leading the UX research for Hope Archive (<https://www.umutarsivi.org/>), an interactive visual database.
- **Problem Solving:** Successfully transformed legacy paper-based administrative systems into digital workflows, significantly improving organizational efficiency through user-centered internal tools.
- **Collaboration:** Worked closely with multidisciplinary teams to deliver data-driven digital solutions, bridging the gap between field research and technology.
