

Deniz Öztürk

Full Stack Developer | UX/UI Designer

I am a multidisciplinary Full Stack Developer and UX/UI Designer with a background in Urban Planning, bringing a unique, data-driven perspective to digital problem-solving. I specialize in building accessible and efficient digital solutions, with a strong focus on transitioning complex manual processes into elegant tools using React Native and Expo. Combining spatial analysis expertise with a commitment to continuous learning, I thrive in environments that challenge me to build high-impact, user-centric applications.

EXPERIENCE

BauPro360 GmbH - Full Stack Developer

2025 - 2026

- **Mobile App Development:** Developed the Baulinx and Worknova mobile applications from scratch using React Native and Expo to digitize construction and HR management processes.
- **State & Data Management:** Implemented complex data flows and dynamic forms for project tracking, personnel management, and technical documentation using React Hooks and Context API.
- **API Integration & Debugging:** Managed seamless integration with backend services and resolved critical synchronization issues to ensure app stability in field conditions.
- **User-Centric Design:** Applied UX/UI principles to create accessible and efficient interfaces tailored for on-site construction workers.

Center for Spatial Justice, Istanbul - Head of Finance and Administration

2020 - 2022

- Developed the innovative financial and administrative monitoring tool for data management, using UX design principles and methodologies for the Center from start to finish according to the data-driven insights
- I facilitated an 80% increase in employee participation in reporting and financial monitoring.
